The Board meets on a quarterly basis and is responsible for the entire process of risk management, as well as forming its own opinion on the effectiveness of the process. In addition, the Board of Directors decides the Firm's risk appetite or tolerance for risk and ensures that the Firm has implemented an effective, ongoing process to identify risks, to measure such risks' potential impact and to ensure that such risks are actively mitigated and/or managed. Senior Management is accountable to the Board of Directors for designing, implementing and monitoring the process of risk management and implementing it into the day-to-day business activities of the Firm. Risk identified through the operation of the risk management framework is assessed as part of the Firm's ICAAP and Pillar 2 processes.

Risk Management Objective

The Firm has a risk management objective to develop systems and controls to mitigate risk within its risk appetite.

Strategies and Processes for managing risks

The risk management framework sets out the responsibilities and escalation procedures for the identification, monitoring and management of risks. Personnel and Senior Management are assigned responsibility for the risks across the Firm's business. The Board takes overall responsibility, with the independent assistance of Risk, Operations and Compliance for identifying material risk to the Firm and implementing appropriate controls.

The governance and controls structure for the risk management of IS Prime is based on the following three lines of defence against risk:

- First line of defence: individuals who are responsible for assessing, evaluating, measuring and controlling risks through the day-to-day activities of the business, within the framework set by the second line of defence. These individuals report to the Firm's Senior Management and second line of defence.
- Second line of defence: Risk Manager and Head of Operations are responsible for implementing and controlling the risk framework set out by the Board. It provides oversight of the first line of defence and the tools to support and improve processes to meet risk management objectives. These functions report to Senior Management and the Board.
- Third line of defence: Compliance, external auditors and Compliance consultants are responsible for providing an independent assessment of the adequacy and effectiveness of the risk management framework. It provides independent oversight of the first and second lines of defence.

Risk and mitigating controls are periodically reassessed by the Board, taking into account the Firm's risk appetite. Actions are taken to improve the control framework when risks are identified which fall outside of the Firm's risk appetite, or when weaknesses are identified in the Firm's mitigating controls.
